

SALVA FRIO AR-22

The AR-22 cabinet is the solution to the processes of direct fermentation and is conceived as a product of easy installation.

CHARACTERISTICS

- **Stainless steel structure**
Totally constructed in stainless steel sheet, covered with insulating materials to avoid the heat loss.
- **Control panel**
It is composed of two wheels that control the thermostats independently, one wheel controls the dry heat and other one the humid heat.
- **Steam and dry heat**
The generation of these, is controlled in an independent way. In addition, his power provides to him a few conditions of steam and ideal temperatures to the instant.
- **Glazed door**
Contributing visibility of the product to the user during the process of fermentation inside the cupboard of direct fermentation.

DETAILS AND COMPOSITION

Capacity

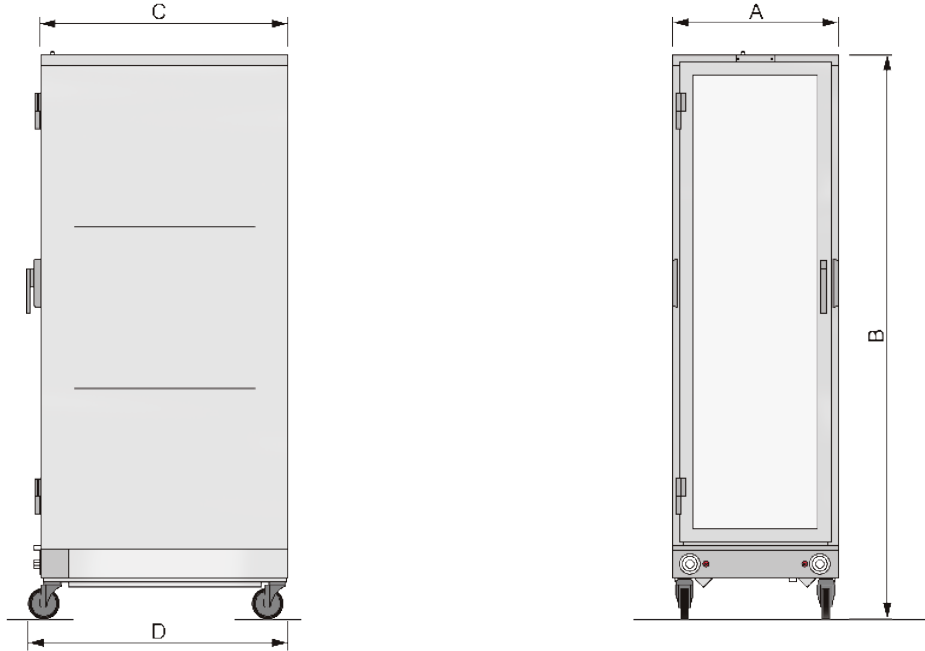

Trays number: 22

Trays dimensions are between 40-46 cm width and 76 cm long.

Technical data AR-22

kW	V	A	Hz
2 (I+N+T)	230	9	50/60

GENERAL DIMENSIONS

AR-22	A	B	C	D	Weight
	558 mm	1905 mm	835 mm	858 mm	- kg

INSTALLATIONS IN DETAIL

Electric power supply

Advisable to locate a fuse between the network and the socket box-base.

The network wires section, must not be less than 1,5 mm².

X	Y	Z
279 mm	0 mm	187 mm
